

DEPARTMENT OF SOCIOLOGY

PROGRAM OUTCOME

Undergraduate Sociology Program Outcomes:

- **Develop Critical Thinking:**
 - Foster the ability to question assumptions and critically evaluate social phenomena.
 - Encourage students to engage with diverse perspectives and challenge conventional wisdom.
 - Equip students with the skills to analyze and interpret complex social issues.
- **Enhance Analytical Abilities:**
 - Teach students to apply sociological theories to real-world situations.
 - Develop skills in identifying patterns, relationships, and trends within social data.
 - Promote the use of logical reasoning to draw conclusions from sociological research.
- **Cultivate Research Skills:**
 - Provide training in qualitative and quantitative research methodologies.
 - Enable students to design and conduct empirical research projects.
 - Emphasize the importance of ethical considerations in social research.
- **Prepare for Various Social Sectors:**
 - Equip students for careers in social services, community development, and advocacy.
 - Develop skills in communication, collaboration, and problem-solving.
 - Encourage a commitment to social justice and equity.

Postgraduate Sociology Program Outcomes:

- **Develop Advanced Critical Thinking:**
 - Deepen the ability to question and critically evaluate complex social phenomena.
 - Foster engagement with diverse theoretical perspectives and contemporary debates.
 - Strengthen skills in analysing and interpreting intricate social issues.
- **Refine Analytical Abilities:**
 - Advance the application of sociological theories to multifaceted real-world situations.
 - Enhance skills in identifying intricate patterns, relationships, and trends within social data.
- **Advance Research Skills:**
 - Provide comprehensive training in advanced qualitative and quantitative research methodologies.
 - Enable students to design and execute complex empirical research projects.
 - Emphasize rigorous ethical standards in conducting social research.
- **Prepare for Academic and Research Careers:**
 - Equip students for advanced roles in academia, including teaching and scholarly research.
 - Develop expertise in specialized areas of sociology.
- **Prepare for Diverse Social Sectors:**
 - Equip students for senior roles in social services, community development, and advocacy.
 - Develop advanced skills in communication, collaboration, and strategic problem-solving.

DEPARTMENT OF SOCIOLOGY

COURSE OUTCOME 2018-20 (Non NEP)

B.A

The undergraduate Sociology course provides a robust foundation in sociological theories and concepts. Early semesters introduce students to sociology, Indian society, and basic sociological concepts. Advanced studies cover social change, development, and foundational sociological thought, with a focus on Indian society's issues and problems. Students gain practical skills in research methodology and explore specialized topics such as rural and urban societies, population dynamics, and gender. This comprehensive curriculum equips students with analytical and research skills, preparing them for careers in academia, social research, policy-making, and social advocacy.

M.A

The postgraduate Sociology course provides a thorough grounding in classical and contemporary sociological theories and methodologies. Early semesters cover foundational concepts, including research methods and comparative studies of social change and development. Advanced semesters delve into contemporary theories, development perspectives, and comparative psychological theory. Specialized topics include Indian society, rural and urban sociology, science and technology, industrial relations, social democracy, and law. The final semester emphasizes optional papers involving critical perspectives, social movements, media, culture, globalization, marginalized communities, and law. This comprehensive curriculum prepares students for careers in academia, research, policy-making, and social advocacy.

COURSE OUTCOME 2021-24 (NEP)

B.A

The undergraduate course in Sociology provides a comprehensive exploration of social structures, cultural dynamics, and societal interactions. Beginning with foundational knowledge in sociological theories and concepts, students will learn to analyse social phenomena and understand the role of social institutions and cultural impacts. The curriculum covers the unique aspects of Indian society, including its diversity, social stratification, and contemporary issues. It also delves into the evolution of sociological thought, examining classical and modern theories. Emphasis on social change and development equips students with an understanding of global and Indian contexts, the effects of globalization, and economic policies. The course includes essential training in research methodology, offering tools and techniques for conducting qualitative and quantitative research. Specialized areas such as rural society, gender, population, environment, and marginalized communities allow in-depth exploration of specific sociological issues, fostering a comprehensive understanding of diverse social contexts. Comparative sociology enhances global perspectives and analytical skills. Overall, the course aims to develop critical thinking, analytical abilities, and research skills, preparing students for advanced studies or careers in social research, policy analysis, and various social sectors.

M.A.

The Post graduate program in sociology is premised on an axiom that a graduate is not simply a product of a system, but rather a reflection of the program's core essence, institutional practices, and the collective efforts of all stakeholders. Students are encouraged to engage with diverse sociological phenomena, fostering analytical and research skills. On the contrary, the graduate attributes are the most concrete manifestation of the spirit the entire program, its operationalization through institutions and collective and concerted efforts of all the stake holders. Every other feature of programme is fused into this. This comprehensive curriculum equips students with a strong grasp of diverse sociological phenomena, preparing them for careers in academia, research and policy-making.
